

A NinjaOne Company

QuickBooks Online Backup

Automatically protect, recover and ensure continuity for business-critical data.

Your QBO solution is not complete without Dropsuite QuickBooks Online Backup

Over half of small-to medium sized businesses (SMBs) in the USA use QuickBooks Online (QBO) and these numbers are sure to grow. When QBO is the lifeblood of a company's finances, it's critical to have the most recent copy of the accounting records should the need occur (data breach or data inquiry).

Dropsuite's QuickBooks Online Backup offers secure continuous and on-demand backup of over 40 QBO objects for quick and easy restore.

The advanced features of this new solution offer businesses enhanced control to protect their data in the cloud. Businesses can now take advantage of point-in-time restore, download archived files for reporting, import into QBO, replicate records to other QBO accounts for testing and training purposes, upgrade/downgrade subscription plans, auditing purposes, and entity changes.

Built with Dropsuite's award-winning backup and archiving technology for Email, Microsoft 365, and Google Workspace, you can rest assured your data is protected, safe and secure.

DAILY BACKUP

By maintaining a continuous journal of data changes, data is assured to be up to date and easy to restore to any previous point in time.

INDIVIDUAL ITEM BACKUP

By backing up over 40 QBO objects individually, data can be searched by an individual item for your business analysis and reporting needs.

SECURE

Dropsuite's regulation-compliant servers employ 256-bit (AES) military-grade encryption and support multi-factor authentication (MFA).

Our numbers speak louder than words

DROPSUITE QUICKBOOKS ONLINE BACKUP MEETS YOUR NEEDS:

- ✔ Continuous and On-Demand backup cadence
- ✔ Individual item-level backup
- ✔ Point-in-time restore
- ✔ Download archived files for reporting
- ✔ Import into QBO
- ✔ Replicate records to other QBO accounts for testing and training purposes
- ✔ Upgrade/downgrade subscription plans
- ✔ Entity changes

Third-Party backup is critical to your Business Continuity and data protection/recovery efforts:

Why back up QBO? With cyber-attacks on the rise plus the “new normal” of remote work and the ensuing use of collaboration tools, there are many opportunities for a data breach. The first step on any cyber-protection checklist is to ensure your data is securely backed up.

Intuit’s disaster recovery plan is platform based: In the event of a data breach, Intuit can restore their entire platform, but they may not be able to restore your individual data. Intuit is unlikely to recover your data from human error, malicious data detection or CSV import errors.

Intuit does not have your data covered:

From Intuit’s T&Cs, Section 6.1.1:

“You are responsible for any lost or unrecoverable Content. You must provide all required and appropriate warnings, information, and disclosures. Intuit is not responsible for any of your content that you submit through the Services.”

Backing up your QBO data with a third-party, cloud solution ensures business-critical data is protected even when Intuit is breached.
