

Website Backup

Safeguard Websites, Protect Databases and Grow Recurring Revenue

Easily integrates with most reseller control panels such as CPANEL, WHMCS, OSA, PLESK, ATOMIA, HOSTBILL & APIs

Dropsuite Website Backup is a cloud-based website, database backup and monitoring service website owners can use to securely backup, recover, monitor and protect their website data. This solution is fully cloud-based, military-grade secure and super easy to use.

Dropsuite's industry-leading solution includes backup for website files and databases. This removes the headache of trying to backup website content separately from databases. This also greatly speeds up the time it takes to backup and if necessary, restore a fully functioning website.

Dropsuite Website Backup includes an easy-to-use blacklist monitoring tool. Feel confident knowing you'll receive an alert should your site become compromised and blacklisted by Google. Quickly identify the problem and restore a clean copy of your site with a single click before your online brand is damaged.

1-Click restore by Dropsuite eliminates the hassle of trying to quickly get your site back. Speed is critical when a website is hacked or tampered with. By using Dropsuite 1-Click restore, you can reduce down-time which helps eliminate losses in revenue, leads and brand value.

Never Lose Website Data Again

Great Value: For less than the cost of a cup of coffee each month, you can save a copy of any website in the cloud and protect it against ransomware, accidental deletion or sabotage.

Safeguarded in the Cloud: Has your website been taken offline or has your web database been tampered with? If you ever need to recover any lost or compromised website data, bring your site back to life with just one click.

Gain Peace of Mind: Over 30,000 websites get hacked every day. In the same way businesses insure their companies from liability, fire damage or theft — every business can now backup up their website.
